

Level of Service Reduction: Region 4

We have long relied on gas tax revenue to maintain the transportation system, but that revenue is declining. More Oregonians are buying hybrid and electric vehicles and using less gas. Meanwhile, the cost of doing business is increasing. ODOT can no longer maintain the system at the level Oregonians need and expect.

In response to this structural funding issue, we are reducing our expenses and services. We must prioritize our efforts and focus on safety. Drivers, cyclists, freight haulers, pedestrians – everyone who relies on our system – will experience a reduction in the service ODOT provides and a decline in the condition of the transportation system.

Region 4 serves eastern Oregon and includes U.S. 97 along with sections of I-84, U.S. 26, and U.S. 20. Our crews operate out of 21 communities, maintaining 1,975 road miles, and 291 bridges.

Implementing our 2023-2025 budget

For our next budget, we implemented a 5% cut across all programs funded with state dollars. Within maintenance, we cut our services and materials an additional 15% to account for inflation and our reduced buying power. We are reducing service in three primary areas:

- Low-volume road maintenance.
- Roadside maintenance.
- Winter maintenance.

Additionally, we are reducing our use of overtime, reserving it for emergency events and storms. As we reduce the amount of proactive maintenance work we fund, we expect an increase in potholes, pavement ruts, and plugged and failed culverts.

ROADSIDE MAINTENANCE

We will reduce the volume and frequency of clearing and cleaning work in these areas:

- Mowing grass, spraying weeds and trimming vegetation.
- Removing brush and tree debris.
- Litter and debris pickup.
- Graffiti removal.

In Your Area

In central Oregon, we are reducing the frequency spent on all roadside work. You'll see more graffiti and debris, particularly in the urban areas of the region, along with more vegetation growth in medians and along highways. Deferring this work allows our crews to address safety-critical tasks.

PAVEMENT MAINTENANCE

We are reducing pavement maintenance for low-volume roads – highways averaging less than 3,000 vehicles daily. We are deferring pothole and chip seal projects, and we are not repainting edge lines.

In Your Area

Roughly 57% of central Oregon's state highways are low-volume roads. System users can expect rougher roads with more potholes and deeper ruts. During heavy rainfall, drivers should expect pooling water in the ruts. If conditions deteriorate enough, we may reduce speeds to give people more time and opportunity to navigate rough stretches of highway.

Edge lines will fade over time, particularly in areas routinely plowed. Drivers will need to rely on the centerline for lane

locations. **We will only restripe faded edge lines** on the following highway segments in the region:

- I-84.
- U.S. 97.
- U.S. 26 to U.S. 97 (Madras).
- U.S. 20 from Suttle Lake to the viewpoint 20 miles east of Bend.
- OR 126 from Suttle Lake through Sisters to Prineville.
- OR 140 from OR 62 to Klamath Falls.
- OR 39 from Klamath Falls to the California border.

Reducing pavement maintenance and eliminating edge line restriping on low-volume roads allows crews to address critical maintenance activities on primary freight routes.

WINTER MAINTENANCE

This winter, we are reducing the amount of sand and deicer we apply to state highways. We will focus our efforts on key highways, hills, curves and known trouble spots.

In Your Area

With fewer seasonal employees, our crews must prioritize key routes, including I-84 and U.S. 97, along with sections of U.S. 26 and U.S. 20. Our crews will plow and sand other highways, including OR 140 and U.S. 395; however, sanding and plowing will occur less often.

We encourage area communities and travelers to prepare the possibility of extended delays, closures, more chain restrictions, and varying degrees of traction as they navigate roads.

With smaller budgets for staff and materials needed to plow, sand, and deice, the potential for traffic jams and crashes increases. Incidents will take longer to clear.

We strongly recommend travelers carry a fully stocked emergency kit, including a phone charger and weather-appropriate clothing, and refuel or recharge their tanks often.

Some highways previously plowed four times per day will be plowed once per day, if at all
